Bob and Melissa

Please see the attached Technical Memorandum prepared by our contractor Parsons and the USACE team.

Tables of validated groundwater analytical information is provided and groundwater contour maps have been added.

We are recommended further investigations/studies.

If you could send me your thoughts/comments on our recommendations it would be appreciated.

Two items of note:

- 1) I deploy tomorrow to Puerto Rico for an earthquake mission and should be gone for 30 to 45 days.
- 2) We have a meeting planned on 22 Jan 2020 to discuss EPA comments to the FS and Allen Roos will sit on for me. Meeting minutes will be prepared by Parsons and pending Corps/EPA approval, distributed to Melissa Sweet.

Regards and if I missed anyone on this email please forward.

Jim
